An Important Work on Archæology.

PRIMITIVE INDUSTRY:

OR,

Illustrations of the Handiwork in Stone, Bone & Clay,

OF THE

NATIVE RACES

OF THE

NORTHERN ATLANTIC SEABOARD OF AMERICA,

BY

CHARLES C. ABBOTT, M.D.

This volume, the scope of which is fully set forth in the above title, is the result of many years of constant labour, in collecting, and studying comparatively, the various forms of stone and bone implements made and used by the Atlantic Coast tribes of Indians once occupying that portion of the country from Maine to Maryland. The shell heaps of the coast, the pottery, and all other existing traces of these people, are fully treated of. It embodies also an exhaustive discussion of the geological age of the implement-bearing gravels of the Delaware River, in relation to the question of the Antiquity of Man in North America; the whole constituting a complete treatise on the subject as referring to this portion of the continent.

The growing interest in Archæology, which is so prominent a feature of the scientific thought of the day, has created the need which it is the object of this work to fill.

The desire to know something of America before the white man with his civilization came to dispossess the Red-men of their birthright; to know more of the peoples who occupied the land, or roamed through the primeval forest; to look into their homes, to study their habits, and to get a nearer view of their domestic economy, is a wish which finds a responsive echo in every thoughtful mind, and has developed into a leading theme for scientific thought.

Dr. Abbott has long held a position in the front rank of American archæological investigators; his long experience as a collector, his years of uninterrupted study, his untiring labours in this, his chosen field of investigation, to say nothing of the talent displayed in the numerous productions already before the public, all combine to make him pre-eminently fitted to assume the authorship of such a work. The archæologists of the world will appreciate the necessity for this contribution to their science, and will second this effort to bring it before the public. It will be the standard work on the subject.

The book will consist of about 700 pages, with over 400 illustrations, royal octavo, price 15*s*. Persons wishing to subscribe should send their names to

"The value to science of Mr. Van Voorst's splendid series of volumes descriptive of the Natural History of the British Islands is scarcely to be overrated. The monographs are all the work of the most eminent naturalists, in whom perfect confidence may be placed, and they are sumptuously printed and illustrated with abundance of excellent plates and woodcuts. The thanks of naturalists generally are certainly due to Mr. Van Voorst."—*Nature*, Nov. 18, 1880.

565 DAWKINS (W. Boyd) Early Man in Britain, and his place in the Tertiary period, 8vo. 537 *pages, illustrated with numerous woodcuts* (pub. at 25*s*), *cloth*, 20*s* 1880

"It is a work to which the reader, curious to know more about the primitive people who dwelt in this land, can confidently refer. The book is full of trustworthy evidence, gathered from the sciences of geology and palæontology, archæology and ethnology, while here and there even philology and history have been laid under contribution. Yet the weight of learning in its pages is by no means oppressive, since it is relieved by a pleasant style of writing, not common, it is sad to say, in works on solid science."—*Athenæum*, April 24, 1880.

567 DOUGLAS (James) NENIA BRITANNICA; folio, LARGE PAPER, 36 **coloured** *plates, with vignettes after Stothard, russia, gilt edges, by Staggemeier*, £6. 10*s* 1793

Douglas' valuable work includes a complete series of the British, Roman, and Saxon Sepulchral Rites and Ceremonies, with the contents of several hundred Burial Places, opened under the careful inspection of the author. The Barrows contain Urns, Swords, Spear-heads, Daggers, Knives, Battle-Axes, Shields, and Armillae; Decorations of Women, consisting of Gems, Pensile Ornaments, Bracelets, Beads, Gold and Silver Buckles; Magical Instruments, and other Relics.

570 FERGUSSON (James) RUDE STONE MONUMENTS in all countries; their age and uses, 8vo. xx and 560 pp. *map and* 234 *woodcut illustrations* (pub. at 24*s*), *cloth*, 15*s* 1872

This great and comprehensive work gives an account of ALL the existing Stone Monuments, and indicates their uses. This volume forms also a complement and companion of the author's well-known work, "THE HANDBOOK OF ARCHITECTURE."

571 HIGGINS (Godfrey) CELTIC DRUIDS: or an attempt to show that the Druids were the Priests of Oriental Colonies, who emigrated from India, and were the Introducers of the first or Cadmean System of Letters, and the Builders of Stonehenge, of Carnac, and other Cyclopean works in Asia and Europe, 4to. *map and numerous lithographic plates of Druidical Monuments, on India paper, bds.* £2. 10*s* 1827

571* ——— the same, *half calf gilt*, £2. 16*s* 1827

The noble independence of Higgins' mind may serve as an example to many readers; the vastness of his learning, the justness of his reasoning, and his critical sagacity, are beyond the ken of ordinary mortals.

PRIVATELY PRINTED for the Cambrian Archæological Association. A highly important work on a subject which has always excited considerable interest amongst historians and archæologists, but of which little has hitherto been known. It opens new and remarkable views concerning old Celtic Art in Britain, and the introduction and the form of Christianity in this country in centuries of which we have had the least knowledge; affords data of considerable value for the elucidation of vexed questions in History and Chronology, and the study of the linguistic peculiarities of the old Cymric tongue.

590 CURTIS (W.) FLORA LONDINENSIS; 3 vols. 1777-98, the AUTHOR'S OWN EDITION, coloured under his immediate inspection; with the CONTINUATION by SIR W. JACKSON HOOKER, 2 vols. 1821-28—together 5 vols. roy. folio, 647 *fine coloured plates, calf*, £35. 1777-1828

Published at £87. 4*s* in parts. These original copies are very scarce.

Of the original work with its 432 plates, the edition published by the author himself is much preferable to that published by Sir William Hooker; and when the continuation by the latter is added to the first issue of the original work, as above, they form the best edition of *Curtis' Flora Londinensis*.

619 ——— the same, folio, *fine copy in russia, joints, gilt edges*, £8. 8*s* 1636

A Herbal in fine condition is a great rarity: the reason is obvious.

Gerarde's Herbal is an English Classic, and ought to be in every Country House.

620 PARKINSON (J.) Theatrum Botanicum, or Theater of Plants, an universall and compleate Herball, folio, *engraved frontispiece, with portrait and hundreds of woodcuts of plants, fine copy in Cambridge calf extra*, £5. 1640

621 TURNER (W.) Herbal, three parts: to which is joyned a Booke of the bath of Baeth in Englande, with diverse other bathes, 1568 —A most excellent and perfecte Homish Apothecarye or homely physick booke for all the grefes and diseases of the bodye, 1561— 2 vols. in 1, folio, *very numerous and accurate woodcuts, calf extra*, £21. *Collen, Arnold Birckman*, 1568-61

For a long account of this celebrated work, see Dibdin, Bib. Spenceriana, Vol. V, p. 196. He does not mention, however, that a *perfect* copy should contain the "homish apothecarye," but mentions only the three parts of the Herbal, thereby implying that the copy in the Spencer Library wants the former. This part was translated from "the Almaine Speche," by Jhon Hollybush, which was the pseudonym of Miles Coverdale, the translator of the Bible.

Pulteney observes that "Dr. Turner was the earliest writer among us that discovered learning and critical judgment in the knowledge of plants."

The present work is introduced in the absence of any adequate illustration of the beautiful Fungusses abounding in our woods and meadows, and for the sake of giving publicity to a most exquisite series of drawings, which have been greatly admired by the author's mycological friends for their correctness. The figures are mostly of the natural size, carefully coloured by hand.

Until this, no work existed on the British Mollusca, in accordance with the rapid advance of our knowledge of Natural History. The assistance which the authors received from the first Conchologists of the day, and the energy which they devoted to make the work as complete as possible, have rendered it one of the ablest treatises on the Natural History of the British Isles.

"Curtis's Entomology," which Cuvier pronounced to have "reached the ultimatum of perfection," is still the standard work on the Genera of British Insects. The Figures, executed by the author himself with wonderful minuteness and accuracy, have never been surpassed, even if equalled.

The sixty-four plates now published were prepared at a time when they (Lindley and Hutton) still had the intention of continuing the publication of their "Fossil Flora." Those plates have been chosen which represent apparently undescribed, rare, beautiful, or problematical specimens. In the brief remarks which accompany the plates, the Editor has made as much use as he could of the notes referring to them left by the authors of the "Fossil Flora."—*Extract from Editor's Preface.*

"Few who have studied the literature of British Zoology can have failed to remark the gap which exists between Owen's 'British Fossil Mammals and Birds,' and Bell's 'British Quadrupeds;' the former dealing chiefly with prehistoric remains, the latter with species still existing. Between these two admirable works a connecting link, as it were, seems wanting in the shape of a history of such animals as have become extinct in Britain within historic times, and to supply this is the aim of the present writer."—*Preface.*

875 RODD (E. H.) The Birds of Cornwall and the Scilly Islands, edited with an Introduction, Appendix and Memoir of the Author, by J. E. HARTING, sm. 8vo. pp. 372, *portrait and map, cloth*, 14*s* 1880

The introduction contains a critical notice of all works relating to the Natural History of Cornwall which have appeared since the date of William of Worcester's Itinerary in 1468, down to the date of the present publication.

"Cornwall presents advantages to the Ornithologist such as are not offered by any other English county. It projects so far south and west into the Atlantic Ocean as to command a climate distinctly milder than that of the south of England generally, and a summer heat that has a certain tropical character about it. It is true that this extreme position deprives it of a few forms abundant in the north and east. Its moors, so prolific in rare species of pipit and plover, are unvisited by such familiar birds as the red grouse; while the black grouse and the quail are so rare as to be considered merely accidental visitors. On the other hand, the muddy estuaries of the Cornish coast are the natural habitat of all the race of redshanks, knots, and sandpipers, a great variety of which swell the list of county fauna with more than twenty species." —*Saturday Review.*

878 SELBY (P. J.) ILLUSTRATIONS OF BRITISH ORNITHOLOGY: LAND AND WATER BIRDS; *a most magnificent work of* BRITISH BIRDS, containing an exact and faithful representation, in their full natural size, of all the known species found in Great Britain, 2 vols. atlas folio, 383 *Figures in* 221 *plates*, PROOFS *on* INDIA PAPER, *a few stained* (pub. £59. 17*s*) 1825-34
Descriptive Letterpress, 2 vols. 8vo. 1833
— together 4 vols. *uniformly bound in half green morocco, gilt edges, by Wright*, £20. *Edinburgh*, 1825-33-34

879 ——— the same, 2 vols. atlas folio, 221 *beautifully* COLOURED PLATES (pub. at £105.) in the original stiff wrappers; with the TEXT, 2 vols. 8vo. very clean throughout, £55. 1825-33
A genuine original subscriber's copy.

880 ——— another early copy, 2 vols. atlas folio, 221 *beautifully* COLOURED PLATES, with Text, 2 vols. 8vo. *uniform in half green morocco, gilt edges*, £45. *Edin.* 1833, *London*, 1841
Either of these copies should be secured by a fastidious collector, as the colouring in the original copies is much preferable to that in *modern* copies, bearing the date 1841, floating about the market; in these later copies some of the plates—of which the coppers had been lost—were reproduced in lithography.

881 ——— a copy of the later issue, as described above, 2 vols. 8vo. and 2 vols. atlas folio, 221 *coloured plates, hf. green morocco, gilt edges*, £37. 10*s* 1841

882 SELBY'S British Ornithology—the Text, 2 vols. 8vo. *hf. cf.* 12*s* 1833
There exists great irregularity in the numbering of the plates, some being apparently wanting; but the sequence is explained in the LIST OF PLATES in the 8vo. Text. There exist no plates IV and LI* in Vol. II, although they are mentioned in the Text.
"WHAT A SPLENDID WORK! This is a kind of ornamental furniture, in which we, were we men of fortune, would delight.—What a treasure, for instance, during a rainy forenoon in the country, is such a gloriously illuminated work as this of Mr. Selby's. It is without doubt the most splendid of the kind ever published in Britain, and will stand a comparison, without any eclipse of its lustre, with the most magnificent ornithological illustrations of the French school."

891 YARRELL (W.) HISTORY OF BRITISH BIRDS, *third edition*, with considerable additions, 3 vols. 8vo. 550 *woodcuts*, £5. 1856

892 ———— the same, *fourth edition*, revised and enlarged by Alfred NEWTON, 13 parts, 8vo. *full of woodcuts*, at 2*s* 6*d* each 1871-80

Four volumes will complete this edition.

The work contains a history and a picture portrait, engraved expressly for this work, of each species of the Birds found in Britain.

The continued popularity of Yarrell's works, testifies to the talent of that eminent Naturalist. His History of British Birds still occupies the highest place both for scientific knowledge and for correctness of illustration.

"Of the fourth edition by Professor Newton only four parts have been published during the four past years. If, as we suppose, about twenty more parts are required to finish the work, it is manifest that unless the present rate of progress be expedited it will be twenty years before we are able to send our new 'History of British Birds' to the binders."—*Nature*, Jan. 27, 1881.

"The labour involved in the production of a monograph such as that now under consideration is very great. All the 235 species occurring on the British coast are figured, with one or two exceptions, in cases where specimens do not exist for the purpose.

"The cordial thanks of Zoologists are certainly due to Mr. Hincks for having produced this most useful work. It will be valuable not only to the professed naturalist, but also an entertaining addition to the sea-side libraries of those who work occasionally with the microscope for recreation."—*Nature*, Nov. 18, 1880.

Only 200 copies PRIVATELY PRINTED for presents.

Samlesbury Hall—a structure dating from the latter half of the fourteenth century—is perhaps the only building of its kind which has remained inhabited and inhabitable to the present time. Partly composed of wood and partly of massive stone, it offers many peculiarities of the highest interest to the student of old English architecture, while to scholars of a different kind the history of the house and its owners during the first half of its existence is so interwoven with the history of England that the book must supply matter of considerable value. Mansions of this kind, inhabited in succession by generations of historic families, have become so rare in England, that monographs like the above, prepared as a labour of love, deserve to be received with gratitude.

Turner's grandest work.

TURNER'S (J. M. W.) PICTURESQUE VIEWS IN ENGLAND AND WALES, *the complete set of* 96 *exquisite line-engravings*, BRILLIANT ORIGINAL INDIA PROOFS BEFORE LETTERS, with descriptive and historic Illustrations by H. E.
